0722624363 /0703333111

**NAME: PETER NJOROGE GICHOHU**

**AGE: 15 YRS**

**DATE: 13.JUN.2023**

### **ABDOMINAL PELVIC U/S REPPORT**

- Liver is average in size and showed increased but uniformed echogenicity and echotexture relative to kidney. No focal lesion seen.
- Gall bladder is physiologically distended with normal wall thickness. No dilatation of intrahepatic biliary radicles seen.
- Spleen and pancreas appear normal in size and echogenicity, no mass seen.
- Both kidneys are normal in size, position and contour with preserved corticomedullary differentiation. Mild hydronephrosis and no calculi seen.
- Massive free anechoic free fluid noted in the hepatorenal and splenorenal recess.
- Bowel loops at the hepatic, splenic appear suspended and floating.
- There is anechoic free fluid noted in the right iliac region and left iliac region, no mass or free fluid seen.
- Urinary bladder has normal outline with normal wall thickness. No intra or extra luminal lesion visualized. There are no bladder calculi or diverticulum.

**IMP: massive ascites ?? cause**
